CAREER SUMMARY

Aspiring Software Developer and Computer Science student seeking opportunities to apply programming, web development, machine learning, and problem-solving skills while contributing to organizational growth and continuous innovation.

EDUCATION

B.Tech in Computer Science and Engineering (Third Year) – CGPA: 9.65 Pursuing **2025**
Walchand Institute of Technology, Solapur

Diploma in Information Technology – 92.38% Completed **2022-25**
Government Polytechnic, Solapur

SSC: 87.40% Completed **2021-22**
Kuchan High School , Solapur

TECHNICAL SKILLS

Programming Languages
- Java
- C++
- C
- Python

Web Development
- HTML
- CSS
- JavaScript
- React.js

Database
- SQL
- MongoDB

Technologies
- Virtual Reality (Unity)
- REST APIs
- Git & GitHub

WORK EXPERIENCE

Full Stack Developer | Nexolabz Solutions | Intern **June 2026**
- Learning React , Node , Express , SQL , Project Management , PRD , Rust , Tauri

Full Stack Web Developer | Elevance Skills | Intern **Jan 2026 – Feb 2026**
- Developed responsive full-stack web applications using the MERN stack with database integration and dynamic features.
- Tested, debugged, and deployed applications to ensure reliability and performance..

Python Developer Intern | CloudXcent Innovation | Intern **May 2024 – Jul 2024**
- Analyzed weather data from 365 Indian cities using Python, Pandas, and NumPy to identify climate patterns.
- Built visualizations and applied K-Means clustering to generate insights for renewable energy, agriculture, and urban planning.

PROJECTS

EduCator (MERN – Agentic AI) - Project

- Developed an educational web platform for interactive learning and course management.
- Implemented user authentication, content organization, and responsive UI design.
- Built using modern web development technologies.

MediCare (Flutter App Development) - Project

- Created a healthcare mobile application using Flutter for patient management and appointment scheduling.
- Developed features for appointment management and healthcare service access.
- Focused on user-friendly design and efficient data management.

Indian Weather Data Analysis (Python) Project

- Analyzed weather datasets from 365 Indian cities using Python, Pandas, and NumPy.
- Developed data visualizations and applied K-Means clustering to identify climate patterns and regional trends.

MicroScope Live Streaming in Virtual Reality (VR application development – Unity) - Project

- Developed a Unity-based VR microscope system enabling real-time microscope live streaming.
- Integrated Azure Blob Storage and Gemini AI for image storage and intelligent image analysis. Enhanced scientific learning through immersive VR visualization.
- Presented the project at the state-level Dipex 2025 Exhibition.

ACHIVEMENTS

WIT Hackathon 2026 – 2nd Prize Winner Developed Medicare, a healthcare application that provides medication reminders and improves patient adherence to treatment schedules.

DIPEX 2025 (State-level Exhibition and Competition) - Selected to exhibit the project "Microscope Live Streaming in Virtual Reality" at the College of Engineering, Pune (COEP).

WIT College Website Development – Development Team

Developed and deployed the official WIT Solapur website using HTML, CSS, JavaScript, and PHP, delivering a responsive, modern, and user-friendly interface for institutional information and services.

DECLARATION

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
